

α ALPHA ANTENNA®

Model – Mast Guying Adapter (MGA)

Overview

Stabilize your tripod by installing this Mast Guying Adapter (MGA) on Loop masts and Vertical whips for more stability when the winds begin to blow.

Thank you for purchasing and using the Alpha Antenna® Mast Guying Adapter (MGA). Compatible with third party masts and antenna elements that are 11mm or less in diameter. Although it is also tailor made for the Alpha Loop 2.0 mast and the FMJ/MIL 2.0 antenna whips when deployed.

Installation

To install the Mast Guying Adapter (Image A), just insert your mast into the 11.20 mm center hole of the Mast Guying Adapter, then place it at an appropriate position for sufficient guying (Image B). Then tie our optional Black 550 Cord Type III 7 Strand Paracord guy ropes and stakes or your own Ropes and Stakes to each of the 3 holes on the Mast Guying Adapter.
